Study Design

Non-cancer: Normal, DM, HTN, Heart Dz (n=100 each)
Values: median [IQR] or %
p: Kruskal–Wallis / χ^2 test

Smoking

Coded as 0/1/2 → never / former / current
unk = missing in source CRF
Computed from clinical CSV

Drinking

Coded as 0/1/2 → never / former / current
unk = missing in source CRF
Computed from clinical CSV

Notes

PAC, CRC have no smoking/drinking records (→ 100% unk)
OVC, LC partially recorded
χ^2 includes unk category
